Developing Finance KPI Dashboards

Github Link:- <https://github.com/San-bytes/Data-Analytics-For-Business/tree/main/Finance-KPI>

Problem Statement

You are a Financial Analyst in an organization. Management wants to monitor budgeted and actual financial amounts, budget variance, transaction activity, payment methods, departmental spending, regional distribution, and financial trends. Develop an interactive Finance KPI dashboard in Power BI that helps evaluate financial performance and supports detailed analysis through filters.

Methodology

The dashboard was developed in Power BI using the Sheet1 financial dataset. The analysis combines KPI cards, a gauge, a yearly budget-versus-actual chart, a monthly transaction trend, a category variance waterfall chart, a department-region matrix, and a payment-method donut chart. Interactive Department, Region, and Date controls allow the dashboard to be explored dynamically.

DAX Measures Used

1. Total Budget

- **Total Budget = SUM('Sheet1'[Budget Amount])**

```
1 Total Budget = SUM('Sheet1'[Budget Amount])
```

Calculates the total budgeted amount.

2. Total Actual

- **Total Actual = SUM('Sheet1'[Actual Amount])**

```
1 Total Actual = SUM('Sheet1'[Actual Amount])
```

Calculates the total actual amount recorded in the dataset.

3. Budget Variance

- **Budget Variance = SUM(Sheet1[Actual Amount]) - SUM(Sheet1[Budget Amount])**

```
1 Budget Variance = SUM(Sheet1[Actual Amount]) - SUM(Sheet1[Budget Amount])
```

Calculates the difference between actual and budget amounts. A positive value indicates that actual spending is above the budget.

4. Budget Utilization

- **Budget Utilization % = DIVIDE([Total Actual],[Total Budget],0)**

```
1 Budget Utilization % = DIVIDE([Total Actual],[Total Budget],0)
```

Calculates actual spending as a percentage of the total budget.

Dashboard Images

Image 1: Complete Finance Performance Dashboard

This image shows the complete Finance Performance Dashboard without applying a specific Department or Region filter. The dashboard provides an overall view of financial performance.

Dashboard Components

- Total Budget: 796M.
- Total Actual: 891M.
- Total Transactions: approximately 10.007K.
- Budget Variance: 95M, based on Actual Amount minus Budget Amount.
- Budget Utilization: approximately 1.12, indicating actual spending is above the budget.
- Yearly Budget vs Actual chart compares budget and actual amounts for 2021, 2022, and 2023.
- Count of Transaction ID by Month shows monthly transaction activity.
- Budget Variance by Category shows the contribution of categories to the overall variance.
- Department × Region matrix shows actual amounts across departments and regions.
- Actual Amount by Payment Method shows the distribution across UPI, Card, Bank Transfer, and Cash.
- Department, Region, and Date controls provide interactive filtering.

Image 2: Dashboard with Department = HR

This image shows the dashboard after selecting HR in the Department slicer. All connected visuals update automatically to represent the selected department.

Observations

- Selected Department: HR.
- Total Budget: 137M.
- Total Actual: 156M.
- Budget Variance: approximately 18M, indicating that actual spending is higher than the allocated budget.
- Budget Utilization: approximately 113%, showing that HR has exceeded its allocated budget.
- The Yearly Budget vs Actual chart updates to show HR's financial performance across the available years.
- The monthly transaction trend changes according to HR-related transactions.
- The Budget Variance by Category and Payment Method visuals update based on the HR selection.
- The Department-Region matrix shows HR's actual financial amounts across different regions.
- Overall, the HR filter provides a more focused view of the department's financial performance and spending pattern.

Image 3: Dashboard with Region = Central

This image shows the dashboard after selecting Central in the Region slicer. The dashboard recalculates the KPIs and visual distributions for the selected region.

Observations

- Selected Region: Central.
- Total Budget: 26M.
- Total Actual: 31M.
- Budget Variance: approximately 4M, indicating actual spending above budget.
- Total Transactions: 343.
- Budget Utilization: approximately 1.16, or about 116%.
- The monthly transaction trend and category variance change according to the Central region selection.
- The payment-method donut displays the financial distribution for the selected region.

Business Insights

- The overall Total Actual is 891M, which is higher than the Total Budget of 796M.
- The overall Budget Variance is approximately 95M using the defined Actual minus Budget formula, indicating overspending against the planned budget.
- The overall Budget Utilization is approximately 112%, showing that actual expenditure has exceeded the allocated budget.
- The yearly comparison shows that actual and budget amounts can be tracked across 2021–2023.
- The monthly transaction chart highlights changes in transaction activity over time.

- The category variance waterfall helps identify categories contributing to the overall financial variance.
- The Department × Region matrix provides a detailed cross-sectional view of actual amounts.
- The payment-method chart shows how actual financial amounts are distributed among UPI, Card, Bank Transfer, and Cash.
- When HR is selected, Total Budget is 137M and Total Actual is 156M, giving an approximately 18M overspend and utilization of about 113%.
- When Central is selected, Total Budget is 26M and Total Actual is 31M, giving an approximately 4M overspend and utilization of about 116%.
- The interactive filters make it easier to move from an organization-wide view to focused departmental or regional analysis.

Conclusion

The Finance Performance Dashboard successfully provides an interactive and easy-to-understand view of the organization's financial performance. It compares budgeted and actual amounts, measures budget variance and utilization, tracks transaction activity, and provides financial breakdowns by category, department, region, and payment method. The interactive filters allow users to focus on specific departments or regions and observe how the KPIs and visuals change. Overall, the dashboard supports financial monitoring, helps identify areas of overspending, and provides a clear basis for data-driven financial analysis.
